power & grid

# An introduction to Mitie Power & Grid

April 2025

# Mitie's Power & Grid capabilities

Helping customers **reduce emissions, increase efficiency** and **secure energy supplies**, that create a **greener future**.

- **11kV – 400kV** utility connections
- Independent Connections Providers (ICPs)
- NERS accredited

# Power & Grid capabilities

## Rock Power Connections

EV charging infrastructure & power projects

Building network operator (BNO)

Distribution Network Operator (DNO) frameworks

Contestable works up to 132kV

## ESM Power

Large scale solar & BESS grid connections

In-house Design capabilities

Private networks

Contestable works up to 132kV

## G2 Energy

DNO & TNO network infrastructure upgrades

Large scale BESS & BOP projects

In-house Design capabilities

275kV & 400kV grid works

Containerised substations

## Custom Solar

Consulting & design

Installation & commissioning

Operations & maintenance

Rooftop, ground-mounted & car port solar PV systems
